# CEO's Note

Dear Friend,

Rural Health Mission Nigeria is a nonprofit organisation focused on eliminating barriers to quality healthcare access in underserved and hard-to-reach communities in Nigeria and strengthening the primary health system. We support primary health workers by organising capacity building workshop trainings and conferences and support rural health facilities with clean birth equipments to ensure clean and safe delivery, antenatal medications and supplements for pregnant women to ensure healthy pregnancy. We support under-five children with essential supplements and deworming medications to ensure healthy child growth and prevent malnutrition. We also train home health volunteers in remote communities to counsel pregnant women on birth preparedness and complication readiness. We conduct public health awareness campaigns to promote good public health practices in the community. We also conduct medical outreaches to remote communities and conflict areas to address short term medical needs in order to alleviate suffering and improve early detection of chronic health conditions.

We do all these with the help of our over 100 passionate volunteers across various communities in the Northeast Nigeria. In 2019, we recruited 75 additional volunteers with varying skills including; web design, ICT, clinicians, public health professionals etc.

This year, we conducted 4 medical outreaches in rural communities Gombe and Taraba States reaching over 1500 beneficiaries. We trained 100 home health volunteers and distributed 300 clean lifesaving birth kits across 6 communities in Gombe and Taraba states. We launched the first Nigeria Health Leadership Conference with over 100 participants from across the country and facilitators from 2 international universities (Drexel University, USA and Sheffield University, UK).

We organized the world malaria day awareness campaign where we distributed 100 insecticide treated nets to pregnant women and screened over 100 women in Gabukka, London maidoruwa and Kagarawal communities in Gombe state. We also commemorated the world AIDs Day in collaboration with the Gombe state Nigeria police command where we screened over 200 police officers and referred some.

In the coming year, we are looking forward to sustaining our ongoing efforts, expanding our coverage, engaging new partners and working closely with other CSOs and Nongovernmental organizations whom we have common goals to promote our values. We hope to expand our volunteer database, open new branches in other parts of the country to give more Nigerians an opportunity to support their communities through volunteerism and to reach more rural communities in the country.

I like to sincerely thank our volunteers, donors and partners for not only supporting but also believing in our cause. and to all the women and children in remote communities, be assured that you are our first priority and we will always be there for you.

Thank You

**MUHAMMAD  
AHMAD SADDIQ**

# Our Mandate

## Our Mission

We focus on eliminating barriers preventing access to quality healthcare in underserved and hard-to-reach communities.

## Our Vision

To see every community in Nigeria with sustainable access to basic and quality primary healthcare.

## Our Core Values

Humanity, passion, Innovation, compassion, hard work, accessibility, equality, quality and commitment to community service .

# Our Strategic Approach

# 1

## Facility Support

We strengthen the capacity of primary healthcare facilities by organising workshops for health workers and supporting the health facilities with essential medications/equipments.

# 2

## Health Access & Coverage

We conduct medical outreaches in rural, hard-to-reach and underserved communities to improve healthcare access and facilitate maximum health coverage.

# 3

## Health Policy & Advocacy

We create local influence on public health policies through collaborations with local CSOs and stakeholders to promote public health. We also organise community advocacy to encourage transparency in public health services.

# 4

## Organizational Development

Robust and resilient local and state branches accessing the RHEMN collaboration platform, along with learning and resources for strengthened organizational capacity and improved accountability
